

## Specialty Care Close to Home™

We Work to Get Your Specialty Medications Quickly... and Help You Stay on Track

Because specialty medications are typically very expensive, insurance companies may impose prior authorization or approval before use. We'll help you get the medication your doctor has prescribed at the lowest possible cost.

### We work behind the scenes for you by:

- Determining your insurance coverage and co-pay
- Utilizing manufacturer co-pay cards to reduce prescription cost
- Enrolling you in available foundation assistance programs to help cover high out-of-pocket costs
- Transferring the prescription to your insurance required pharmacy, if necessary
- Providing refill reminder calls to help keep you on schedule with therapy
- Following up to answer any questions after you've started the medication

## Our Pharmacists Are Trained and Ready to Help

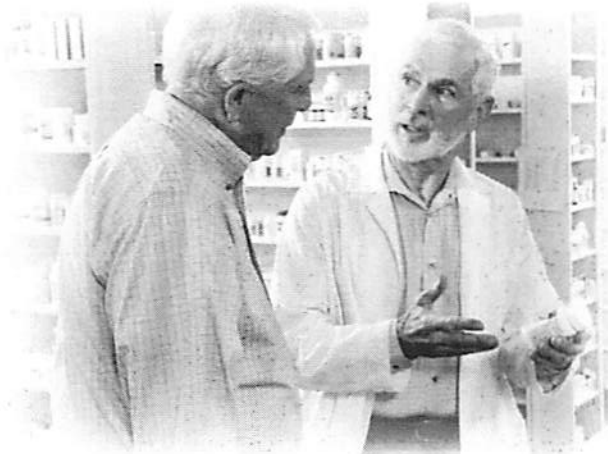

Our pharmacists will explain the proper administration of your medication and can personally answer any questions about its use. After pick up, you're just a phone call away... or simply stop by to talk in person!

### Personal Attention for Your Drug Therapy

- Education on your medication and how it works to manage your condition
- In-person injection training
- Address any concerns about side effects and adverse events

### Conveniently Pick Up Medications

- Pick up your specialty medications right here at Show Me Specialty Rx or have them shipped to your home

## Beyond Specialty Care... Your Pharmacy Home

Show Me Specialty Rx provides a full range of traditional pharmacy services making it a one stop shop for ALL your pharmacy needs.
